Open to a permanent role

Berlin · remote in the EU · hybrid
Open to talk now · start within three months
German (native) · English
€55–70k, depending on scope

AI product engineer with five shipped products under Moran Software (MenuCloud, Salati, NOURI, LexiPulse, Dartile) and further prototypes. Over 6,900 commits since March 2026, alongside a full-time job. Self-taught in software development since 2022. Focus: agent-assisted development with strict verification discipline: a green test run is not proof.

PROJECTS

MenuCloud Berlin Live in production · 2026 `1,281 API routes · 818 DB migrations · 7,800+ test cases · EU hosting & data residency`

Multi-tenant SaaS for restaurants, including statutory fiscal signing. **Fiscal signing as a tenancy problem**

Salati Live in both stores · 2026 `4 device classes · 14 languages · 100% AI runs on the device · over 1,400 commits`

Prayer and Quran platform for German speakers, with AI that runs offline. **Speech recognition for Quran recitation**

NOURI Live on Google Play, iOS in review · 2026 `11,892 recipes in the catalogue · 63 tables · 16 migrations · 538 tests`

Nutrition and training platform: web app, mobile app, one shared catalogue. **A number nobody recomputes is a made-up number**

LexiPulse Live in both stores · 2026 `561 tests · 7 import formats · 0 documents on a server · 2 platforms, one core`

A complete reader for EPUB, PDF and web articles: word stream or running text. **The same pace for every word is the mistake**

Dartile Live on Google Play, iOS in review · 2026 `284 tests · 8 game types · 350 call-outs, two languages · 0 dependencies in the engine`

A darts counter that records every single dart. **The camera suggests, it does not assert**

PROTOTYPES

PROTOTYPE **Moran Fleet Control** · Live with buy button — The one application for the builder's day: LLM chat, agents, tools, backlog, local, no subscription

PROTOTYPE **WohnungsJäger** · In personal use — An autonomous agent that reads the Berlin rental market faster than a human can

PROTOTYPE **BitDojo** · Live on Google Play, iOS in review — German-language learning platform with exactly one lesson library

PROTOTYPE **Aegis** · Live on Google Play, iOS in review — Receipts, deadlines and the cash-basis accounts of a sole trader, computed on the device

PROTOTYPE **Vortex** · Live on Google Play, iOS in review — Spots dropshipping and shows the original price, computed on the device

PROTOTYPE **Synapse** · Live on Google Play, iOS in review — PDFs, photos and notes become flashcards, repeated on the SM-2 schedule, entirely offline

PROTOTYPE **Vesper** · Live on Google Play, iOS in review — Applications, projects and contacts on a local board, with a language model on your own machine

PROTOTYPE **Aether** · Live on Google Play, iOS in review — Your own day as a searchable memory: context, voice notes and thoughts, processed locally

FOCUS AREAS

Frontend & product
React / Next.js App Router · React Native / Expo · TypeScript · Motion & interaction

Backend & data
Postgres / Supabase · API design · Payments · Multi-tenancy

Cloud, delivery & operations
Vercel / edge · Docker / Coolify / Hetzner · CI/CD · Store delivery

AI integration
Agent orchestration · On-device inference · RAG & retrieval · Prompt engineering

PATH

`since April 2026`
Founder & sole developer · MenuCloud, sole proprietorship, Berlin

`since 2022`
Software engineering, self-taught · Meta (Coursera) · Udemy · own projects

Self-taught in software development: no degree, no bootcamp. The evidence is five shipped products and verifiable case studies.

PUBLISHED

verified-done · cron-last-due · whisper-ggml-header · arabic-normalize · darts-checkout: all with tests, CI and an MIT licence on github.com/DomenicMoran
