Open to a permanent role

Berlin · remote in the EU · hybrid

Open to talk now · start within three months

German (native) · English

€55–70k, depending on scope

AI product engineer with four systems in production, each built alone: apps in both stores, a multi-tenant restaurant SaaS with statutory fiscal signing, an autonomous agent. Over 4,000 commits since March 2026, alongside a full-time job. Self-taught in software development since 2022. Focus: agent-assisted development with strict verification discipline: a green test run is not proof.

PROJECTS

Salati Live in both stores · 2026 4 device classes · 14 languages · 100% AI runs on the device · over 1,000 commits
Prayer and Quran platform for German speakers, with AI that runs offline. **Speech recognition for Quran recitation:** The memorisation mode has to hear whether a verse was recited correctly.
React Native 0.86 · Expo SDK 57 · Expo Router · Reanimated 4 · TypeScript · Custom retrieval · whisper.rn

MenuCloud Berlin Live in production · 2026 1,278 API routes · 815 DB migrations · 7,400+ test cases · EU hosting & data residency
Multi-tenant SaaS for restaurants, including statutory fiscal signing. **Fiscal signing as a tenancy problem:** A signing unit is not simply an API call.
Next.js 16 App Router · React 19 RSC · TypeScript · Tailwind · Supabase / Postgres · Row Level Security · Stripe Connect

WohnungsJäger In personal use · 2026 4 portals watched · 24/7 scanning · 2 review stages before sending
An autonomous agent that reads the Berlin rental market faster than a human can. **An agent that does not act unasked.** What makes such a system appealing is also its risk: a bot sending applications with real personal data can do real damage.
Node.js 22 · TypeScript · Fastify · Server-Sent Events · Playwright · Persistent browser profiles · Cron scheduler

NOURI Beta · 2026 11,892 recipes in the catalogue · 59 tables · 12 migrations
Fitness and nutrition platform with a web app, a mobile app and its own API. **An API that does not lie.** Every write endpoint distinguishes explicitly: secrets missing (dry run, no pretence that data was saved), database unreachable (503), database reachable but rejecting (a real 4xx carrying the Postgres error code).
Next.js 16 App Router · React 19 · Expo SDK 54 · React Native 0.81 · TypeScript 5.9 · Fastify 5 · Zod 4

FOCUS AREAS

Frontend & product
React / Next.js App Router · React Native / Expo · TypeScript · Motion & interaction

Backend & data
Postgres / Supabase · API design · Payments · Multi-tenancy

Cloud, delivery & operations
Vercel / edge · Docker / Coolify / Hetzner · CI/CD · Store delivery

AI integration
Agent orchestration · On-device inference · RAG & retrieval · Prompt engineering

PATH

since 04/2026
Founder & product engineer · MenuCloud, sole proprietorship, Berlin

since 2022
Software engineering, self-taught · Meta (Coursera) · Udemy · own projects

Self-taught in software development: no degree, no bootcamp. The evidence is four systems in production.

PUBLISHED
